Public parking

42 Rue de La Tourelle, Paris

Presentation

Dr Brice Touraut is a cardiologist. Specializing in sports cardiology and cardiac rehabilitation, he welcomes you to the various consultation sites of ICES (Institut Cœur Effort Santé): - ICES-PARIS 75005, at 38 boulevard Saint Marcel (end of its activity August 2023, continuation at ICES Suresnes) - ICES-SURESNES 92150, Pole Santé DocCity, 5 rue Gardenat Lapostol (start of activity September 2023) - ICES within IMSS-SF PARIS 75016 (Institut Médical Sport Santé - Stade Français) , multidisciplinary practice, Stade Jean Bouin Porte C, 34 avenue du Général Sarraill The 3 consultation locations are interconnected with a secure shared medical file (so each patient can be received in the same way in one center or another, access for the doctor in the same folder). He receives you for general cardiology consultations, sports cardiology or to organize exercise cardiac rehabilitation programs. He carries out consultations with resting ECG, resting cardiac ultrasounds and stress tests, +/- coupled with the measurement of VO2 max if necessary, and both on the bike and on the treadmill. On the various ICES consultation sites, he works in a network with other cardiology specialists (rhythmology, vascular medicine angiology, cardio-pediatrics, sleep specialist), with all the necessary ambulatory explorations within the group (ultrasound cardiac stress test, arterial or venous Doppler ultrasound, Holter-rhythmic ECG/24h, Holter blood pressure ABPM/24h, polysomnography). ICES cardiologists work jointly, depending on their places of practice, with a wide range of multidisciplinary medical and paramedical activities: general medicine, sports medicine, traumatology and surgical advice, physiotherapy and balneotherapy, podiatry, dietetics, radiology, APA coach etc. Thus, thanks to the ICES network, he will be willing to organize optimal cardiovascular care, particularly through physical activity if necessary in order to improve overall health.

Spoken languages

English and Spanish

National and university diplomas

2019

OF. Cardiovascular rehabilitation - University Paris 7 - Bichat

2013

OF. Sports cardiology - Paris 6 University - La Pitié Salpêtrière

2011

D.I.U. Echocardiography - Paris 12 University - Créteil

Experiences

2015 - 2017

Head of university clinic-hospital assistant - Bichat Hospital - Claude Bernard - Paris - Physiology - functional explorations

2010 - 2015

Intern - Bichat Hospital - Claude Bernard - Paris - Cardiology
